Transition House

A Men's Co-Occurring Enhanced Residential Rehabilitation Service Program

Serving Males with Mental Health
Disorders and Co-Occurring Disorders in
the Commonwealth of Massachusetts

What can I expect if I participate in the program?

The Transition House Program provides 16 beds to men with a mental health disorder and co-occurring substance use disorder. The Program is located in a three-story building providing a comfortable, safe, home-like environment.

Consumers participate in the program as long as needed as they work on developing recovery skills and support systems. Men are also assisted with obtaining employment, entitlements, parenting skills, living and coping skills as well as finding appropriate housing.

These skills, services, and supports empower men so they successfully transition into the community and experience long-term recovery and an improved quality of life.

I feel better prepared for challenges in my life. My counselor has helped me work through some difficult issues and to build my recovery. I truly feel like I am transitioning to a better place in my life
